1. Initially, applicant is kindly requested to use a larger font size, especially for submissions transmitted by facsimile.

2. The amendments to the specification filed on May 14, 2004 have not been entered. The amendments do not comply with the requirements of 37 CFR 1.121(b) because applicant has not included the amended paragraphs. Amendments to the specification filed on or after July 30, 2003 must comply with 37 CFR 1.121(b) which requires that changes be made to, and include, the paragraph, section or entire specification.

3. Claims 6, 10 and 11 are objected to because of the following informalities:

- Claim 6 is the same as claim 7. The sole difference in the text is that in claim 6 the locking release mechanism spring communicates with both the locking release mechanism main member and the locking release mechanism arm. In claim 7 (section c.) the locking release mechanism spring communicates with only the locking release mechanism arm. However, this is not a substantive difference because the locking release mechanism main member and the locking release mechanism arm are pivotally attached to each other, and any portion that communicates with one inherently communicates with the other.

- On line 2 of claim 10, "comprises of a" should be -comprises a-.
- On line 3 of claim 10, after "of" it appears that -the- should be inserted.
- On line 2 of claim 11, after "of" (second occurrence) it appears that -the- should be inserted.

Appropriate corrections are required.
